List of Acceptable Alternative Standards to ISO 20000

IRCA has determined that, for the purposes of conformance with the IRCA/1002 ITSMS auditor certification criteria, the submitted standards detailed in this document are considered acceptable alternatives to the ISO 20000 Standard.

IRCA's evaluation of these standards includes a technical review for the purposes of validation of acceptability of an applicant's claim of experience "equivalent" to auditing Information Technology Management Systems Standards to ISO 20000. This evaluation is used only to determine whether audit experience using these standards meets the audit experience requirements stipulated in the IRCA auditor certification criteria. It is not intended as a technical review of the equivalence of a standard to ISO 20000.

IRCA will review submitted standards, update and reissue this list periodically.
